

DIAMOND COMPOUND

DiaMold Diamond Compound is a diamond polishing compound specially formulated for use in mold & die applications.

Proven Formulation

DiaMold Diamond compound will withstand severe lapping conditions without loss of cutting quality. The use of a stable carrier assures sustained particle suspension throughout the process cycle.

Better Coverage

DiaMold Diamond Compound's unique blend also provides more surface coverage and improved impregnation of lapping tools.

Oil-Soluble

DiaMold Diamond Compound can be used with DiaMold and Hyprez OS Type IV (oil soluble) lubricants to meet specific requirements of material and surface finish.

Great Advantages

DiaMold Diamond Compound offers these outstanding advantages:

- Superior surface tension
- Consistent viscosity
- Does not evaporate
- Oil-based
- Pleasant odor
- Economical
- Aggressive removal rates
- High adhesion to tools and surfaces
- Generates highly reflective surface
- Easily cleans with DiaMold Lubricant

Mold & Die Polishing Compound for the finishing specialist who demands the best!

DiaMold Diamond Compounds are available in several dispensing containers:

- 10 gram syringe
- 20 gram syringe
- 10 gram dip jar

VALUE KITS

- 1 ea. 10 gram syringe 3, 6 & 9 (item #340.5144)
- 1 ea. 10 gram syringe 1, 3, 6 & 9 (item #340.5143)
- 1 ea. 10 gram syringe 9,15 & 30 (item #340.5145)

Ordering guide:

Specify quantity, micron size, type of compound, container size and type, i.e.
3 pcs. 6-DiaMold Diamond Compound 20 gram syringe

Call a **free sample** of DiaMold Diamond Compound: **1-800-99-ENGIS**

We will also send you a free DiaMold catalog that contains one of the most comprehensive offerings of mold and die repair, finishing and polishing equipment and supplies.

Everything for the mold and die finishing professional.
